

# VisSTORE

EASY DATA ACCESS AS A SERVICE

## Benefits:

Empowers local and distributed **teams** by allowing data sharing via web links

One-click **data analysis and sharing**

Save Time and **access your data in seconds** securely from anywhere

Save Money by **paying for storage only**, not upload or download bandwidth

**VisStore™** provides streaming technology to efficiently display very large 2D or 3D multi resolution data with:

- **Fast data access with local cache**
- **Manage long-term data reliance with cloud storage**
- **Reduce the risk of data loss**

Additionally, our software framework can provide extensions to support interoperability features, ensuring that current your workflows are not disrupted and enabling a fast and smooth transition to switch to our technology, such as through our Python API and Jupyter Notebooks.

## Data Hosting and Management

VisStore™ provides data management and hosting services with maintenance of the repository, regular updates as new data becomes available, and conversion into streamable format for easy access, exploration, processing and download.

## Multiresolution Streaming

Our web interface allows the exploration of data with a progressive resolution refinement (e.g., requesting from the server higher or lower resolution data depending on the zoom level) across multiple platforms.

## Integrate

Compatible with all major data service providers

VisStore™ can extend a workstation's memory hierarchy to both an external network-attached hard drive (NAS) and cloud-based storage.

We provide:

1. Data hosting on elastic high availability server
2. Data streaming server/s testing and deployment
3. Regular synchronization of the data server, conversion of the data available, and corresponding update of the catalog of available data.

Purchase Options:

- Free \$0/month for 100 GB disk Space with unlimited data streaming for 1 year
- Pay-as-you-go \$2.99/month subscription includes 100 GB disk Space with unlimited data streaming, \$6 - \$12/month/TB disk space and team data sharing (includes 1 warm storage with up to 2 copies for archival backups)
- Custom plans available for private or cloud storage with flexible invoicing and discounts for upfront payment
